Revision

Course Overview — Autumn Term

- **Introduction**
  - 1 Information, Data or Programs 2
- **Combinational Circuits**
  - 2 Basic Logic Gates 3
  - 3 Karnaugh Maps 5
- **Sequential Circuits**
  - 4 Sequential Logic / Flip-Flops 6
  - 5 Memory / Registers 7
  - 6 The Tri-State / Bus 8
- **Data Representation**
  - 7 Integer Numbers 9
  - 8 Characters / Strings 9 / 17
  - 9 Decimal Numbers 10
- **Central Processor Unit**
  - 10 The Central Processor Unit 11 / 13

Course Overview — Spring Term

- **Central Processor Unit** (*Cont*.)
  - 11 The ARM Processor 13
  - 12 Addressing Modes 14 / 17
- **Assembly Programming**
  - 13 Data Movement 14
  - 14 Logic 15
  - 15 Structure / Loops 16
  - 16 *Reading Week*
  - 17 Strings 17
  - 18 The Stack / Subroutines 19
  - 19 Paramater Passing 19
- **The Outside World**
  - 20 Interrupts / Exceptions 20
  - 21 CISC / RISC 12
  - 22 Input / Output 21

Revision Topics

1. Combinational Circuits
   Truth Tables / Karnaugh Maps / Logic Gates
2. Sequential Circuits
   Clocking / Flip-Flops / Tri-State / Bus
3. Data Representation
   char, wchar (Unicode), unsigned int, int, float
4. Central Processor Unit
   RISC / CISC / Instruction Pipeline
   Addressing Modes / Register Transfer Language
5. Assembly Programming
   Stack / Subroutines / Parameters / Instruction Set
   Loops / Structures
6. Input / Output
   Interrupts / DMA / Buses

Exam Technique

- **Revision**
  Write a half page review of each lecture
  Copy it out several times, by hand
  Review previous exam papers
- **The Question Paper**
  Read the paper twice before deciding which questions to answer and in what order
  Read the question again before starting to answer
  Read the mark allocation, 10 marks per page
- **Your Answer**
  Sketch / Outline your answer first
  Use short sentences
  Make one point per sentence
